Courbe™ & Ruban™

Courbe and Ruban create a co-ordinated range of sack holders specifically designed for contemporary locations. Manufactured in Armortec™ coated steel, the strong and robust sack holders are vandal, corrosion and weather resistant.

Design Features

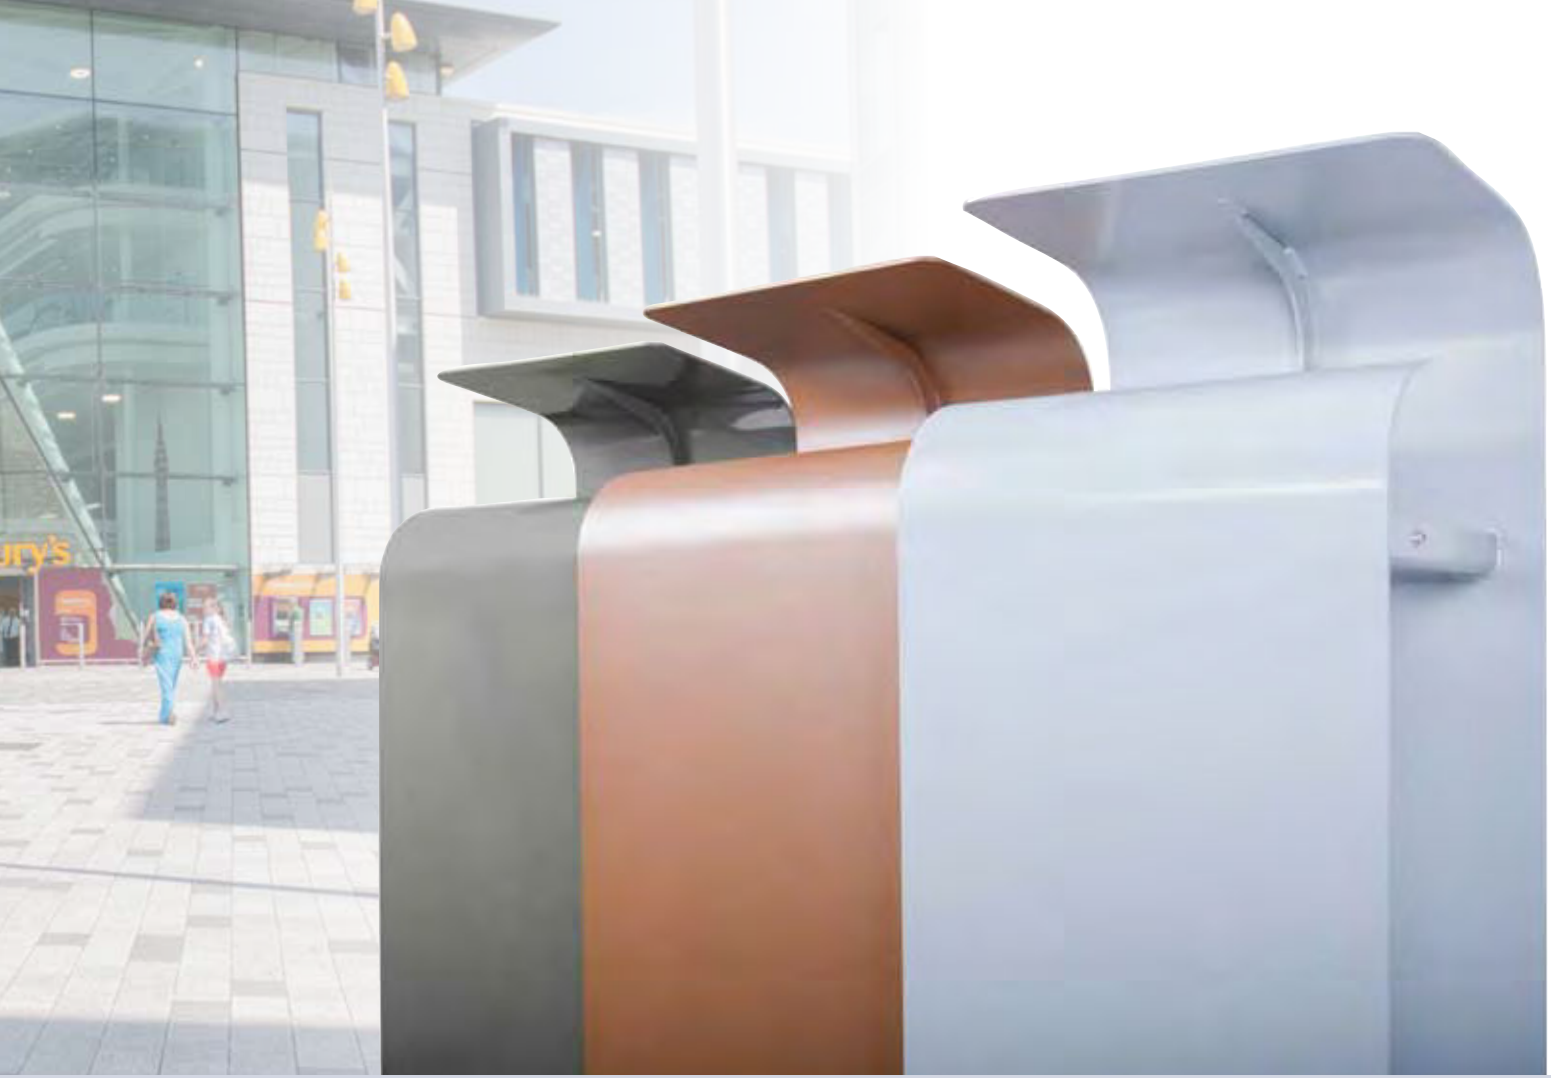

- Contemporary design
- Enables clear visibility of deposited waste
- Hooded aperture provides weather protection
- Concealed sack retention system
- Manufactured in vandal, corrosion and weather resistant Armortec coated steel

Ruban

Courbe

With it’s smooth contours and narrow footprint Courbe fits neatly into any public space. Available in a choice of colours and finishes, Courbe will enhance any location.

Ruban

The sleek design of Ruban ensures it suits any outdoor location. Available with a choice of fixing options to suit your requirements, Ruban has a long service life due to it's durable steel construction.

Their unique design allows style and functionality while still maintaining site security. Featuring a concealed sack retention system suitable for sacks as large as 80L, both bins enable clear visibility of deposited waste. Perfect for any location that require a receptacle for collecting litter without raising the security risk posed by traditional litter bins.
