ELECTRA™ RANGE

The Electra range offers a multi-functional collection combined with un-paralleled style.

With the ability to be used as stand-alone units or together as a recycling station, the Electra range enables you to create tailored solutions for waste management

DESIGN FEATURES:

- Contemporary styling
- Anodised and polished finish
- 100% recyclable after usable life
- Narrow footprint
- Robust construction
- Full length door(s)
- Magnetic strip and cam lock
- Solid liner or sack retention system
- Ground fixing feet

Electra 60

ELECTRA LITTER BINS

A contemporary twist on a classic metal litter bin, the Electra combines stylish simplicity with exceptional strength and functionality. Designed with the modern environment in mind, the unique aesthetic of the Electra will transform any location.

Electra 170 Quad

ELECTRA RECYCLING BINS

The Electra recycling range offers you the ability to build a coordinated, aesthetically-pleasing recycling station. Dedicated recycling apertures help to prevent cross contamination and the open-top aperture improves ease of use.

With a variety of sizes and options available, you can have confidence in knowing that the Electra recycling range will fulfill your waste management needs.

Electra 120

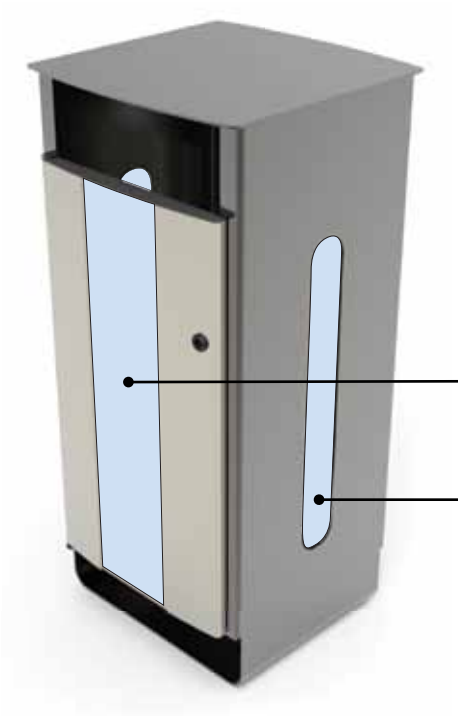

The Electra recycling containers are also available to order with a choice of recognisable recycling graphics to help users identify the waste stream.
