NEXUS EVOLUTION

Recycling is evolving!

The new Nexus® Evolution internal recycling bin is the perfect solution to your recycling needs.

Ideal for the collection of up to four separate recycling streams in one large-capacity container, the versatile Nexus Evolution allows you to create your own modern indoor recycling station.

With 3 models, 5 configurations and over 50 interchangeable apertures available, the Nexus Evolution is set to become one of the most flexible recycling bins on the market!

Duo Model

3 models, 5 configurations and over 50 interchangeable apertures available.

Colour coded apertures are available to collect 80L or 40L of your chosen waste stream, enabling you to create a unique Duo, Trio or Quad recycling station to best suit your requirements.

Trio Model

The open-top aperture enables ease of use, while the flip-lid hides any unsightly waste and helps to contain any odours from within the bin. The unique lid design allows apertures to be fixed together using the optional aperture connector kit and opened as one complete lid or left as individual panels.

Quad Model

Design Features

- 160 litre capacity available in Duo (80/80L), Trio (80/40/40L) & Quad (40/40/40/40L) models
- Manufactured using Durapol® material
- Dedicated aperture panels can be fitted in any configuration*
- Colour coded aperture panels and graphics to minimise cross contamination
- Pivoting lid with lid stay
- Individual waste stream bungee sack retention system
- Narrow footprint allowing flexibility of siting
- Dual sided unit is approachable from the front or the rear

Optional Extras

- Lock kits (included as standard with confidential paper aperture)
- Wheel kit with two wheels and handle for easy manoeuvring
- Sign kit
- Divider kit (included as standard with confidential paper aperture and cup & liquid aperture)
- Aperture connector kit
- Choice of ground fixing options
- Personalisation

** Exceptions apply for confidential paper aperture and cup & liquid aperture. Contact our sales team for more information.*

Cup Recycling Station

Helping you to implement an efficient cup recycling programme, our cup and liquid aperture allows the easy collection of up to 100 used cups and disposal of 8 litres of residual liquid. The unit also features two 40L colour-coded aperture panels of your choice to create your own unique Cup Recycling Station.

The dedicated Cup Recycling Station will ensure that this waste does not contaminate other recyclable streams and it will also make bulk collection easier, enabling you to increase your cup recycling rates and save money on your waste collection too!

Confidential Paper Aperture

Our dedicated confidential paper aperture is provided as standard with a keyed push lock situated at the front of the unit for ease of access. (Lock kit can be provided as an optional extra on all other apertures).

A divider is also provided as standard with this aperture to conceal the contents and ensure your waste is secure prior to disposal.

Personalisation

With large graphic areas on the front and rear of the unit and recessed areas on the sides, Nexus Evolution is ideal to showcase advertising and company campaigns or can be utilised to increase
