TURIN PLUS LIQUIDS

The **Turin Plus Liquids bin** is the ideal solution for environments requiring clean, efficient liquid disposal with a refined aesthetic.
It can be installed individually for exclusive liquid collection or paired with other Turin bin models to create recycling stations that allow in a single location the collection of liquids, bottles & cans, organic waste, ... etc.

Main Advantages and Features

- **Versatility and Capacity:** The top deposit opening facilitates easy disposal of liquids, including ice cubes, with an internal drum with 25L capacity.
- **Hygienic and Clean System:** The liquid circulation and storage system is specially designed to prevent internal leaks, keeping both the bin and surrounding area clean.
- **Visual Fill control:** When the internal drum reaches full capacity, the top deposit opening fills with liquid to a visible indicator (--MAX--), signaling to users that the bin is full, preventing overfilling.
- **Safe & Clean Emptying:** Turin Plus has an internal liquid circulation system that incorporates mechanisms that allow the drum to be removed and emptied cleanly and safely. In addition, the bin incorporates a liquid retention tray so that in the event of any liquid being spilt by accident during the emptying process, the liquid remains in the tray.
- **Additional Protection:** Turin Pus Liquids incorporates a filter to prevent solid objects from clogging the drainage system, ensuring uninterrupted operation.
- **Access to the interior:** through the front door with magnetic system (optionally available with triangular key lock).
- **Stability:** Includes adjustable legs for stable positioning. Also available ground floor anchorable version (optional).
- **Maintenance:** The disposal area and the liquid collection system are accessible for easy cleaning and maintenance.

Optional Accessories

- **Wheels:** Add mobility with a set of four concealed wheels in the base (without brakes).
- **Signage panel:** Allows custom messaging at the disposal point.
- **Waste identification stickers:** Option to indicate the type of waste by means of a basic or special front sticker (with customized design).
- **Spare drum:** Improve the emptying efficiency by having a spare drum (specially adapted for Turin bin liquids).

Materials and Finish

- **High Resistance and Durability:** Made of galvanized steel with a thermoset polyester resin powder coating, suitable for indoor and outdoor use.
- **Corrosion-Resistant Materials:** Top deposit opening made of stainless steel 316 and liquid collection system made of plastic.
